

Citizens Group “Asian“(ええじゃん) Seminar

Problem-Solving for Living in Japan

We would like to enjoy lives with people from abroad living around us, helping each other on day-to-day basis. It is often difficult to understand the way of life, culture, customs, laws, and institutions of Japan. Although there are many helpful systems and professional agencies in Japan if and when we are in trouble, often it is difficult for foreigners to get to them particularly with language barrier.

As a citizens group called “Asian” we have long been engaged in free-consultation work for non-Japanese speakers, and have decided to hold a series of seminars once a month under a different topic each time. We have chosen cases of troubles that many foreigners experience in Japan and will invite a person with expertise in the related topic, will discuss the issue in groups to deepen the understanding of the problem and will have time for individual consultation. Our method is not the Japanese teaching foreigners Japanese ways, but rather through discussion both Japanese and foreigners will deepen understanding of each other and build a friendly community enriched by different cultures and through cooperation. We'll be open to the participants' opinions to better the contents of the seminar.

* The dates may be changed due to the speaker's schedule.
